In response to applicant's amendment dated June 14, 2005. The following action is taken:

Claims 5-8 are rejected for the same reasons set forth in the previous office action mailed March 02, 2005.

Claims 1-4 are allowed.

Applicant's arguments filed June 14, 2005 have been fully considered but they are not persuasive. Applicant's arguments are centered around the prior art not showing or teaching the newly added limitation "repeated wobble pattern". The examiner interprets such limitation as a wobbling pattern having a repeated up and down pattern. A wobbling pattern is merely a sinusoidal signal having an inherent repeated up and down pattern. Thus the limitation "repeated" is inherently present in a wobbling pattern. The argument drawn to the "encoding each bit..." is not supported nor claimed in the claimed invention.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 2655

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
